230V
Max 4kW

£295

CEEform 32 amp
Three-phase
400V
Max 8kW

£350

N.B. Prices are for weekend hire.

How many watts do you need?

To select a connection that has enough power for your needs, add the watts for items you may want to run at the same time during the show. Use the total wattage, plus an extra 20%, as your minimum power requirement.

The watts given on the next page only are estimates. The actual wattage required for your appliances may differ from those listed. Always check the nameplates on your appliances.

Appliances and tools with induction motors (marked * in tables on the following pages) may require from 3 to 7 times the listed wattage when starting. The start-up load of the appliance or tool determines whether an inverter has the capability to power it. Be sure to check the specific wattage requirements and operating instructions for appliances / tools to be used.

N.B. (conversion formula: Watts ÷ 120 = Amps .... Amps x 120 = Watts)

How many watts do you need?

Common Appliances	Estimated Watts
Coffee Machine	600-1200
Blender	300-1000
Microwave (600-1000w Power)	1000-2000
